

*Service, Knowledge, and Experience Since 1952. . .*

Since 1952 to today, sometime in 2011, we have depended on our Product Knowledge to gain & retain customers. Anyone can sell junk. We want to be different. We only sell top quality Oils & Lubricants. That's why our products list only has the brand names you have grown up with and have grown to trust. We do a lot of product research before we add a new brand. Is it top quality? Is it worthy to be added to our list? Do our customers need it and will they buy it from us? Is it just another brand or is it a new entry in the ever growing world of oils and lubricants? Can we buy it at a price that we can resale to our customers so they can generate new profits? That's why we depend on our product research team to make those wise decisions and we depend on our product knowledge to help you know the application of each oil and lubricant that we have in stock. We will utilize every type of information available to satisfy your lubricant question. Product Spec Sheets and MSDS are at our fingertips.

We strive to deliver your order to you correctly EACH & EVERY time. 99% correct is not good enough for us. That's why we are listening to you more and asking you more questions. Our goal is to totally satisfy your oils & lubricants requirements on each & every order.

If you have not tried our DURABLE Oils, maybe you need to. Our DURABLE Oils are top-rated oils only without the racecar and yacht attached to it. They are 'what-you-see-is what-you-get' oils. Passenger car motor oils, heavy duty diesel oil, automatic transmission fluid, and AW hydraulic oils comprise our DURABLE Oils. They have been tried and perfected over the 15 years we have carried them. We charge a competitive price for them and that allows you to add profit to your bottom line.

We try to always tell you THANK YOU. Thank you for your business. Thank you for your friendship. Thank you for your prompt payment. Thank you for telling someone else about us. Thanks to you, we are still in business after all these numbers of years. If we ever disappoint you, call me. If we ever need to provide emergency product to you, please call me. Thank you for being our customer or possibly our future customer. Welcome to our family!

Thanks for shopping with
